

# Treatment Cost Calculator

See options. Save money.

The power's in your hands. Our Treatment Cost Calculator helps you explore a wide range of healthcare options and potentially save money.

With the Treatment Cost Calculator you can easily:

- Save money with more informed shopping.
- Review a helpful estimate of costs for specific treatments (based on your plan's coverage).

- Compare costs for in-network and out-of-network providers.
- Search by medical treatment, service or condition.
- Find doctors, hospitals and clinics in your area.

Log in to hally.com and choose "Learn More" under "Cost Calculator" at the top of the "At-A-Glance" page.

[hally.com](https://hally.com)

The screenshot displays the hally.com website interface for the Treatment Cost Calculator. The main heading is "Knee Replacement - Full". Below this, there is a "Description" section explaining the surgery. A prominent feature is the "Your Out-of-Pocket Estimate: \$8,206", which is based on average costs for in-network providers in Illinois. A breakdown of costs is provided: Hospital: \$22,881; Primary Physician: \$3,411; Other: \$2,187. A bar chart shows the out-of-pocket estimate of \$8,206, which is composed of an Employer/Plan Share of \$20,273 and an Out-of-Pocket Estimate of \$8,206. Below the bar chart, it lists Deductible: \$3,139; Copay: \$0; Co-insurance. The page also includes sections for "Inpatient Procedures" (Average hospital stay: 1 - 2 days), "You will save money...", "Did you know?", "Questions to ask your doctor...", and "Remember to...". A dotted line with arrows points from the "hally.com" text to the "Learn More" button on the Cost Calculator widget and to the "Your Out-of-Pocket Estimate" section.
